

MBX Mini

Good things come in small packages

Small is the new mighty.

Bring your deployments to life with the versatility of the MBX Mini. It's just as brilliant as any other MBX device we have to offer. So connect your devices to the PoE enabled LAN ports to provide network simplicity as well as IEEE 802.1X port authentication. This MBX Mini has the power to achieve it all.

Keep your connection flowing in whatever deployment that you're immersed in and deliver more power and redundancy with **THREE** power input options: DC Source A, DC Source B, and a terminal block.

One. Two. Three. Four.

We know fast connections are critical to achieving great things. Its dual-band Wi-Fi and 5G capabilities ensure you experience the fastest available network. If the dual embedded cellular WANs are not enough, the MBX Mini can be expanded to **FOUR** cellular WANs by simply connecting it to our MAX Adapters via the dual USB ports.

Making hard to manage feel like hardly managing.

With this FusionSIM-ready router, you can say goodbye to switching and managing multiple SIMs via the router. FusionSIM offers remote provisioning of SIM profiles from anywhere in the world. Managing made easy, ready when you are!
